## Key Features

### PERFORMANCE

A manually operated interactive machine enclosed within a see through Acrylic cabinet.

1. All gears and workings are 100% visible to the visitor for a real interactive experience.
2. Visitor friendly - sturdy construction resists wear and tear. Cleaning is quick and easy.
3. Custom designs uniquely reflect attraction or promotional event.
4. Pressing pennies requires minimum physical effort - perfect for everyone, including young children and older adults.
5. Manual operation means no electrical outlet is required.
6. Made from highest grade materials including 6061 aircraft aluminium, hardened and stainless steel, ensuring optimal performance.

### REVENUE

An easy way to generate immediate and consistent revenue.

1. Reliable revenue generator from all visitors.
2. Unique and innovative graphics from top to bottom are eye-catching to visitors of all ages.
3. Four die impressions can quadruple sales from each visitor.
4. Replaceable dies promote feature attractions and limited time events, encouraging repeat sales from return visitors.
5. Multiple unit placement on site can grow visitor revenue significantly.
6. Value-added collector passports will encourage higher revenue from each visitor.

### DESIGN

Standout form and graphics will attract customers in any location.

1. Manufactured in Canada.
2. High quality, hand engraved dies created exclusively by skilled artisans.
3. Customized graphics on machine promote brand value.
4. Ultra small footprint - less than two square feet - ensures machine complements any area or venue - large or small.
5. Unique retro-modern appearance attractive to visitors of any age.
6. Straightforward, intuitive design makes it easy for visitors of any age to press a penny.
